## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

 Claims 9, 18, 23, and 26-28 are, drawn to headgear and support device, classified in class 5, subclass 655.

II. Claims 30, 32, and 34 are, drawn to method of utilizing a headgear with an infant, classified in class 128, subclass 857.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the claimed method does not require a support pad and the claimed product can be used as with any person exercising or resting.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
